ACQUIRED

NO. OF ENCLS.
(LISTED BELOW)

DATE OF INFO. 25X1X6

**SUPPLEMENT TO
REPORT NO.**

1. Apart from the local Kemendatura the only troops stationed in Oranienburg are approximately 600 quartered in a camp located a short distance from the railroad station.
2. Soldiers entering and leaving the camp appeared to be about 21 to 23 years of age. The officers were older men. Uniforms were new and in good condition but leather equipment and boots, on the other hand, were old and shabby. Machine carbines and carbines, carried by the troops, also looked like old wartime arms rather than new equipment.
3. The sentry at the camp entrance wore black shoulderboards with red piping.
4. 
5. Many of the troops seen in the town had had the tank emblem removed from their shoulderboards; the place where it had formerly been attached could be clearly seen.
6. A tank observed travelling towards the camp had the T-34 suspension, but was equipped with a gun not quite as long as the German 88-mm with a double-baffle muzzle-brake. The turret was similar to the T-34/85, although the corners were not quite as sharp. The tank was battered down and no crew was visible. The glacis plate was similar to that of the T-34, and there was a driver's vision slit on the port side. The sides of the tank were vertical. Auxiliary gas

tanks were carried on the rear superstructure sides. The gun mantlet was not prominent, the general impression being that the barrel entered the mantlet plate without any large collar or mounting.

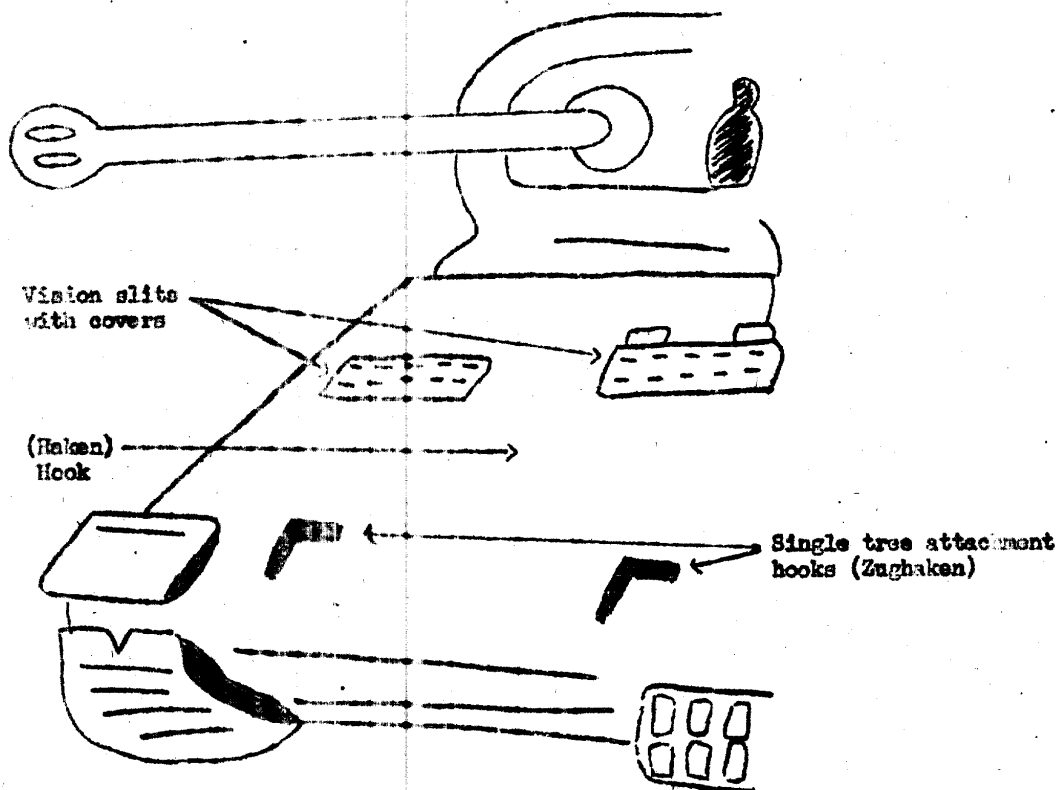

7. The tank was painted grey-brown and bore no markings.
